About TMF AI ICURE Engage

TMF AI ICURE Engage aims to identify potential beneficiaries of research, introduce participants to tools for commercialisation, and foster consideration of entrepreneurship as a pathway for achieving societal impact and a viable career choice.

The TMF AI ICURE Engage programme is open to all researchers from all disciplines, who are or wish to, explore increasing the adoption of responsible and trustworthy AI. This is an introductory, light-touch opportunity, available regardless of whether there is already an adoptable idea; the programme introduces them to [ICURE](#) and provides the space and opportunity to think about entrepreneurship differently.

We are particularly interested in applications from the following thematic areas:

- Explainability
- Mechanistic interpretability
- Model poisoning
- Safety and agentic alignment
